- c. Click on appearance → themes → install themes → upload → browse themes file and click **install now**

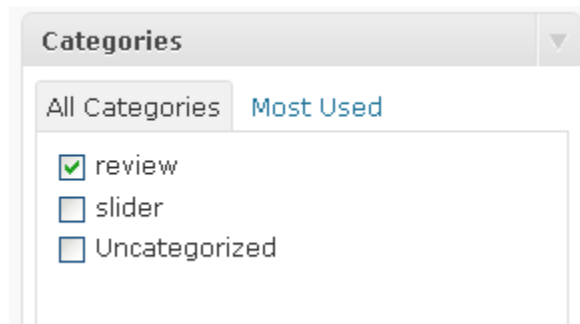

2. Post review articles

1. Go to admin panel. And click add new on "posts" section :

2. Post article just like you make a posting on wordpress
3. Make "category" of your post to manage your posting. **i.e : review or review post**

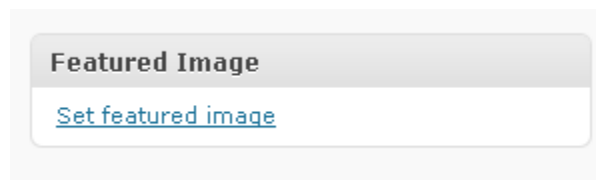

4. Add post info below the post article area :

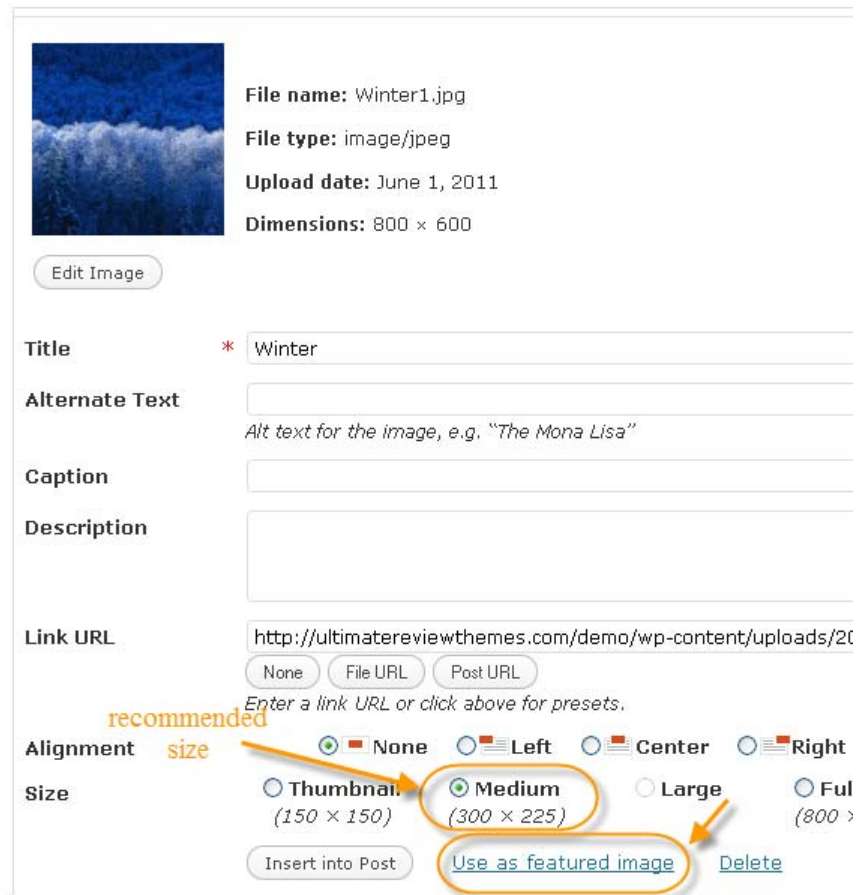

5. Add final conclusion box (overview of the reviews) below :

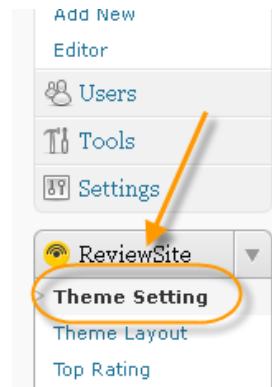

6. post a featured image (screenshot of review product you promote)

The screenshot shows a WordPress media upload form. At the top, there is a thumbnail of a blue, textured image. To its right, the following information is displayed: **File name:** Winter1.jpg, **File type:** image/jpeg, **Upload date:** June 1, 2011, and **Dimensions:** 800 × 600. Below this is an "Edit Image" button. The form fields include: **Title** (with a red asterisk and the value "Winter"), **Alternate Text** (with a placeholder "Alt text for the image, e.g. 'The Mona Lisa'"), **Caption**, **Description**, and **Link URL** (with a placeholder "http://ultimatereviewthemes.com/demo/wp-content/uploads/20..."). Below the URL field are buttons for "None", "File URL", and "Post URL", and a note "Enter a link URL or click above for presets." The **Alignment** section has radio buttons for "None", "Left", "Center", and "Right". The **Size** section has radio buttons for "Thumbnail (150 × 150)", "Medium (300 × 225)", "Large", and "Full (800 × 600)". The "Medium" size is selected and circled in orange. An orange arrow points from the word "recommended" to the "Medium" size. Below the size options are buttons for "Insert into Post", "Use as featured image" (circled in orange), and "Delete".

7. Go to Theme setting :

8. Choose Review category becomes same to the categories you created at the time of posting an article review (don't forget to click save settings after it)

The screenshot shows the WordPress media uploader interface. At the top left is a thumbnail of a pink water lily. To its right, the following metadata is displayed: **File name:** Water-lilies.jpg, **File type:** image/jpeg, **Upload date:** June 1, 2011, and **Dimensions:** 800 x 600. Below the thumbnail is an "Edit Image" button. To the left of the main form are labels for "Title", "Alternate Text", "Caption", "Description", "Link URL", "Alignment", and "Size". The main form contains a "Title" field with the text "Water lilies", an "Alternate Text" field with placeholder text "Alt text for the image, e.g. 'The Mona Lisa'", a "Caption" field, and a "Description" field. Below these is a "Link URL" field containing a long URL, with buttons for "None", "File URL", and "Post URL" below it. At the bottom of the form are radio buttons for "None", "Left", "Center", and "Right" alignment, and radio buttons for "Thumbnail (150 x 150)", "Medium (300 x 225)", "Large", and "Full Size (800 x 600)" size. The "Full Size" option is selected. At the very bottom are buttons for "Insert into Post", "Use as featured image" (which is circled in orange), and "Delete".

- This section has a function to describe your affiliate link
- It's automatically cloak Affiliate url on top rating box and visit link button on your post.
- **PLEASE NOTE : The link you put on post info (on post area) MUST BE SAME LINK that you put on cloaker**
 - For example : on the post info you put <http://yahoo.com> – then on cloaker menu, you should also put the exact same words <http://yahoo.com> --- if you put <http://www.yahoo.com>, although it's same link – the cloaker would't works, because they read it as different link so be careful!
